Right now I am using this: `try { //do stuff } catch(Exception $e) { //stuff }` where I am making sure that if any error occurs, the rest of the script is not executed. My question is, 1) Does throwing an exception occur under any circumstances? and/or 2) If so, what is the purpose of the try-catch? A: My question is, 1) Does throwing an exception occur under any circumstances? Yes, it does. and/or 2) If so, what is the purpose of the try-catch? The try-catch is for handling problems with the resources you are using in your code. If you don't handle problems in the resources you are using, then there can be serious consequences for your application. A: If an error occurs, an exception will be thrown. Then, the code in the try block will execute - in which case, you catch the exception to deal with it, and you can choose to continue or stop. A good place to understand this is in a foreach loop. If an error occurs in the loop, you will get an exception. `foreach($array as $value){ //error }` A: try-catch is very valuable for one very important use case. Imagine a file upload field. You want your user to be able to upload a file easily

Nov 29, 2009 Announcement on special InGame forum for the service of Battlestations: Pacific (as a thank you to the people who've registered on the forum, especially after much frustration when internet connection disappeared). Concerning bug reports and requests for help. Dec 13, 2009 Official BSmodHQ 1.2+ patch. All new fixes and new units/structures (discovered by Anatoly); . VICTORY: A fast way to create your custom resource packs! VICTORY is a simple tool that allows you to create your own custom game packs. You may download and use it without charge! VICTORY allows the creation of resource packs for each patch within Battlestations: Pacific, the BSmodHQ update, and the BSmodHQ Deluxe packs. VICTORY is a long overdue alternative to those resource packs that are modified directly into the game, and is a much better option than those patches and trainers that are not tested! Victory is especially useful when saving and restoring to the Battle of Midway map, which allows one to have different scenarios for each map! VICTORY is necessary to create resource packs VICTORY actually allows the creation of a number of different resource packs; . During the installation of a win32 version of a game and the installation of DLC, it is possible to save and restore the savegame, with various snapshots, to any map in the game. After each map, one can create an alternative scenario in the same way, as if the win32 version was not patched, and so creates a new game. VICTORY TESTED! VICTORY was tested on more than 6000 games on different Windows operating systems. You can download VICTORY and a sample of such resource packs at the following site: . VICTORY is completely free, and doesn't have any hidden costs. REQUIREMENTS VICTORY requires the Battle of Midway map to create any resource pack. To create a scenario for any patch of Battlestations: Pacific, you need to install VICTORY and then download one of the sample resource packs from the site. HOW TO USE VICTORY is very simple, as follows: choose a map, and select the version of Battlestations: Pacific you want to create resource packs for; . choose a resource pack from one of the samples below, or create your own
